AUTHOR INDEX – 1979

Alger, Kenneth
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Barker, Robert H.
Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interation of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Benerito, Ruth R.
Surface and Bulk Properties of Flame-Retardant Cotton Fabrics. Part II. Effect of Exposure to Atmospheric Conditions, p. 225

Brauer, Diana P.
The Effect of Fire Retardants on Combustibiliy and Toxicity, p. 20

Toxicity of Gases Produced by Pyrolysis of Viscose Fibers Containing a Flame Retardant, p. 27

Effect of Low Levels of Bromine in a Polyester Resin System, p. 35

Smoke from Polyester Resin Systems Under Various Conditions, p. 49

Brauman, Sharon K.
Char Forming Synthetic Polymers. I. Combustion Evaluation, p. 249

Char Forming Synthetic Polymers. II. Char Characterization, p. 266

Chance. Leon H.
Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

Daigle, D. J.
Finishing with Ureidophosphorus: A Compound, Not a Condensate[2] p. 276

Drake, Jr., George L.
Performance of a Mushroom Apparel Flammability Tester in Evaluating "Partially Flame-Retardant" Cotton Flannelette, p. 3

Evaluation of Flame-Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Drews, Michael J.
Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Ecker, E. L.
On the Use of Phosphorus as an FR-Adjunct with Halogenated Unsaturated Polyesters, p. 182

Finn, John M.
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

Frank, A. W.
Finishing with Ureidophosphorus: A Compound, Not a Condensate[2] p. 276

Goynes, Jr., Wilton R.
Evaluation of Antomony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

Hilado, Carlos J.
The Effect of Fire Retardants on Combustibility and Toxicity, p. 20

Toxicity of Gases Produced by Pyrolysis of Viscose Fibers Containing a Flame Retardant, p. 27

Effect of Low Levels of Bromine in a Polyester Resin System, p. 35

Smoke from Polyester Resin Systems Under Various Conditions, p. 49

Kay, M.
A Review of Intumescent Materials, with Emphasis on Melamine Formulations, p. 69

Keating, Esmond J.
Energy Reduction in the THPOH-NH_3 Process, p. 167

Koonce, K. L.
Use of Bromine, Antimony Oxide and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Kullman, R.M.H.
Finishing with Ureidophosphorus: A Compound, Not a Condensate[2], p. 276

Lambert, Allan H.
Energy Reduction in the THPOH-NH_3 Process, p. 167

Larsen, Eric R.
On the Use of Phosphorus as an FR-Adjunct with Halogenated Unsaturated Polyesters, p. 182

Lavery. I.
A Review of INtumescent Materials, with Emphasis on Melamine Formulations, p. 69

Smoke from Polyester Resin Systems Under Various Conditions, p. 49

Kay, M.
A Review of Intumescent Materials, with Emphasis on Melamine Formulations, p. 69

Keating, Esmond J.
Energy Reduction in the THPOH-NH_3 Process, p. 167

Koonce, K. L.
Use of Bromine, Antimony Oxide and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Kullman, R.M.H.
Finishing with Ureidophosphorus: A Compound, Not a Condensate[2], p. 276

Lambert, Allan H.
Energy Reduction in the THPOH-NH_3 Process, p. 167

Larsen, Eric R.
On the Use of Phosphorus as an FR-Adjunct with Halogenated Unsaturated Polyesters, p. 182

Lavery. I.
A Review of INtumescent Materials, with Emphasis on Melamine Formulations, p. 69

Marquette, Y,
Use of Bromine, Antominy Oxide and Nitorgen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193.

Needles, Howard L.
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Peterson, Mary Don
The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 173

Petrella, Ron V.
The Explosive Combustion of Hydrogen and Oxygen Inhibited by Halogen Compounds, p. 125

Price, A. F.
A Review of Intumescent Materials, with Emphasis on Melamine Formulations, p. 69

Reagan, Barbara M.
The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 173

Reeves, W. A.
Use of Bromine, Antimony Oxide, and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabircs, p. 193

Rhee (Ryu), Hyo-Seon
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Rolow, Ann M.
The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 173

Segal, Leon
Performance of a Mushrcom Apparel Flammability Tester in Evaluating "Partially Flame-Retardant" Cotton Flannelette, p. 3

Evaluation of Flame-Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Smith, B. F.
Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112.

Calorimetric Study of Polyester-Cotton Blend Fabrics. III. Effects of Binary Retardant Systems p. 149

Soignet, Donald M.
Surface and Bulk Properties of Flame-Retardant Cotton Fabrics. Part II. Effect of Exposure to Atmospheric Conditions, p. 225

Tai, Anne
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Tesoro, Giuliana C.
Chemical Technology in the "TRIS" Experience, p. 239

Timpa, Judy D.
Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

Yeh, Kwan-nan
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Valente, Jill A.
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Verburg, Gerald B.
Energy Reduction in the THPOH-NH_3 Process, p. 167

Whelan, W.
The Synergistic Flame-Retardant Activity of Iron Compounds in Halogen-Containing Nitrile Polymer Compositions, p. 206

Ammonium Fluoborate
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

Antimony Oxide
Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Use of Bromine, Antimony Oxide, and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Bromine
Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Use of Bromine, Antimony Oxide and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Caliban
Use of Bromine, Antimony Oxide and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Calorimetry
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Cellulose
Evaluation of Antimony Oxide on Cotton and Cotton-Polyester Fabrics, p. 55

Cellulose, Fire Retarded
The Effect of Fire Retardants on Combustibility and Toxicity, p. 20

Char Characterization
Char-Forming Synthetic Polymers: 2. Char Characterization, p. 266

Char Evaluation
Char-Forming Synthetic Polymers: I. Combustion Evaluation, p. 249

Charring Ability
Char-Forming Synthetic Polymers: I. Combustion Evaluation, p. 249

Combustion
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustionnd Effects of Partial Retardants, p. 92

Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Cotton
Photo-Induced Fixation of Fyrol 76, Acrylic Acid and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Evaluation of Antimony Oxide on Cotton and Cotton-Polyester Fabrics, p. 55

The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 167

Use of Bromine, Antimony Oxide and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Surface and Bulk Properties of Flame-Retardant Cotton Fabrics. Part II. Effect of Exposure to Atmospheric Conditions, p. 225

Cotton Dyes, Cotton Flannelette
Performance of a Mushroom Apparel Flammability Tester in Evaluating "Partially Flame Retardant" Cotton Flannelette, p. 3

Cotton, Fire Retardancy
Finishing with Ureidophosphorus: A Compound, Not a Condensate[2], p. 276

Cotton Flannelette
Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Decabromodiphenyl Oxide
Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Diammonium Phosphate
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Dibromaneopentyl Glycol
On the Use of Phosphorus as an FR-Adjunct with Halogenated Unsaturated Polyesters, p. 182

Dimethyl Formamide
Evaluation of Antimony Oxide on Cotton and Cotton-Polyester Fabrics, p. 55

Drying
Energy Reduction in the THPOH-NH_3 Process, p. 167

Durable Press
Use of Bromine, Antimony Oxide, and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Energy
Energy Reduction in the THPOH-NH_3 Process, p. 167

Energy Dispersive X-ray Analysis
Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

ESCA
Surface and Bulk Properties of Flame-Retardant Cotton Fabrics. Part II. Effect of Exposure to Atmospheric Conditions, p. 225

Fire Resistance
Use of Bromine, Antimony Oxide, and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Flame Retardance
Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effectsof Binary Retardant Systems, p. 149

Energy Reducton in the THPOH-NH_3 Process, p. 167

Surface and Bulk Properties of Flame-Retardant Cotton Fabrics, Part II. Effect of Exposure to Atmospheric Conditions, p. 225

Flame Retarded Composites
The Synergistic Flame-Retardant Activity of Iron Compounds in Halogen-Containing Nitrile Polymer Compositions, p. 206

Flammability
Performance of a Mushroom Apparel Flammability Tester on Evaluating "Partially Flame Retardant" Cotton Flannelette, p. 3

Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

The Explosive Combustion of Hydrogen and Oxygen Inhibited by Halogen Compounds, p. 125

Flame Retardant Synergists
The Synergistic Flame-Retardant Activity of Iron Compounds in Halogen-Containing Nitrile Polymer Compositions, p. 206

Flammability, Flame Retardant Finishes
The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 173

Flash Photolysis
The Explosive Combustion of Hydrogen and Oxygen Inhibited by Halogen Compounds, p. 125

Fuels
The Explosive Combustion of Hydrogen and Oxygen Inhibited by Halogen Compounds, p. 125

Fluoborates
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

Halogenated Unsaturated Polyesters
On the Use of Phosphorus as an FR-Adjunct with Halogenated Unsaturated Polyesters, p. 182

Halogen Compounds
The Explosive Combustion of Hydrogen and Oxygen Inhibited by Halogen Compounds, p. 125

Halogen Synergists
The Synergistic Flame-Retardant Activity of Iron Compounds in Halogen-Containing Nitrile Polymer Compositions, p. 206

Heat Release
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Hydrogen
The Explosive Combustion of Hydrogen and Oxygen Inhibited by Halogen Compounds, p. 125

Ignition Time
Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Intumescent Materials, Review
A Review of Intumescent Materials, with Emphasis on Melanine Formulations, p. 69

Iron Compounds
The Synergistic Flame-Retardant Activity of Iron Compounds in Halogen-Containing Nitrile Polymer Compositions, p. 206

Isoperibol Calorimeter
Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Laundering
Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Lightfastness
The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 173

MAFT, Mushroom Apparel Flammability Tester
Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

Mechanisms of FR
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

Methacrylic Acid
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Mushroom Apparel Flammability Tester
Performance of a Mushroom Apparel Flammability Tester in Evaluating "Partially Flame Retardant" Cotton Flannelette, p. 3

Mushroom Tester MAFT
Performance of a Mushroom Apparel Flammability Tester in Evaluating "Partially Flame Retardant" Cotton Flannelette, p. 3

Nitrile Polymers
The Synergistic Flame-Retardant Acitivity of Iron Compounds in Halogen-Containing Nitrile Polymer Compositions, p. 206

Nitrogenous Agents
Use of Bromine, Antimony Oxide, and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Cotton/Polyester Fabrics, p. 193

Oxygen Index, Flame Retardants
Performance of a Mushroom Apparel Flammability Tester in Evaluating "Partially Flame Retardant" Cotton Flannelette, p. 3

Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Phosphoric Acid
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Phosphorus
On the Use of Phosphorus as an FR-Adjunct with Halogenated Unsaturated Polyesters, p. 182

Phosphorus Interaction
Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Photo Effects
Surface and Bulk Properties of Flame-Retardant Cotton Fabrics. Part II. Effect of Exposure to Atmospheric Conditions, p. 225

Photo-induced
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Polyester
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Evaluation of Antimony Oxide on Cotton and Cotton/Polyester Fabrics, p. 55

Polyester/Cotton Blends
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Use of Bromine, Antimony Oxide, and Nitrogen to Produce Fire and Wrinkle Resistant Cotton and Polyester/Cotton Fabrics, p. 193

Polyesters, Brominated
Effect of Low Levels of Bromine in a Polyester Resin System, p. 35

Polyesters, Smoke
Smoke from Polyester Resin Systems Under Various Conditions, p. 49

Polyethylene
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

Polymer Fixation
Photo-Induced Fixation of Fyrol 76, Acrylic Acid, and Methacrylic Acid on Polyester and Cotton Fabrics, p. 14

Polyolefins
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

Polypropylene
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

PVC Fabric, Fire Retarded
The Effect of Fire Retardants on Combustibility and Toxicity, p. 20

Rate of Heat Release
Calorimetric Study of Polyester/Cotton Blend Fabrics. I. Combustion and Effects of Partial Retardants, p. 92

Rate of Heat Transfer
Performance of a Mushroom Apparel Flammability Tester in Evaluating "Partially Flame Retardant" Cotton Flannelette, p. 3

Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Reactive Dyes
The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 173

Scanning Electron Microscopy
Evaluation of Antimony Oxide on Cotton and Cotton-Polyester Fabrics, p. 55

Steam Sterilization
Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Surfaces
Surface and Bulk Properties of Flame-Retardant Cotton Fabrics. Part II. Effect of Exposure to Atmospheric Conditions, p. 225

Surface Flame Propagation
On the Use of Phosphorus as an FR-Adjunct with Halogenated Unsaturated Polyesters, p. 182

Synergism
Calorimetric Study of Polyester/Cotton Blend Fabrics. II. Interaction of Flame Retardant Fibers, p. 112

Calorimetric Study of Polyester/Cotton Blend Fabrics. III. Effects of Binary Retardant Systems, p. 149

Thermoplastics
Ammonium Fluoborate in Flame Retardant Thermoplastics, p. 285

THPOH-Amide
The Effects of THPOH-Amide Flame Retardant on the Lightfastness of Selected Fiber Reactive Dyes, p. 173

THPOH-NH

THPOH-NH_3
Energy Reducition in the THPOH-NH_3 Process, p. 167

TRIS, History
Chemical Technology in the "TRIS" Experience, p. 239

Ureidophosphorus
Finishing with Ureidophosphorus: A Compound, Not a Condensate[2] p. 276

Urethane Foam, Fire Retarded
The Effect of Fire Retardants on Combustibility and Toxicity, p. 20

Verticle Flame Test
Evaluation of Flame Retardant Flannelette with a Mushroom Apparel Flammability Tester After Hospital Laundering and Sterilization, p. 39

Viscose Fibers, Pyrolysis
Toxicity of Gases Produced by Pyrolysis of Viscose Fibers Containing a Flame Retardant, p. 27

Weathering
Surface and Bulk Properties of Flame-Retardant Cotton Fabrics. Part II. Effect of Exposure to Atmospheric Conditions, p. 225
